Trusted Data Solutions and SAVARTUS Announce Strategic Partnership to Provide Archive Data Migration, Restoration and Management Solutions and Services.

Delivering Efficient Management via Advanced Data Analytics, Any-to-Any Migration, Data Restoration Services, and Immutable Long-Term Retention for Security and Compliance.

New York [Current Date] – Trusted Data Solutions (TDS), the foremost expert in archived data management solutions, and SAVARTUS, a leader in active archive and data management have announced a strategic partnership aimed at revolutionizing archived data restoration and management. This collaboration combines TDS's industry-leading solutions including its Restoration Assurance Program (RAP) with SAVARTUS's innovative Enterprise Laser Storage (ELS) Optical Data Archive Libraries to deliver comprehensive, end-to-end solutions for restoring, accessing, and modernizing data currently stored on legacy media.

TDS is renowned for helping organizations address complex legal, compliance, and regulatory requirements through secure and reliable legacy data solutions. RAP ensures the accuracy, security, and integrity of data restoration, providing enterprises with the confidence they need to manage critical archived data. SAVARTUS provides end-to-end active archive solutions, including the SOPHIA Unified Data Interface for Storage, Tape Backup & Restore options, and Enterprise Laser Storage (ELS) Optical Data Archive Libraries, all backed by superb customer service and global support.

Key Benefits of the Partnership:

- **Data Management Solutions:** SAVARTUS provides highly scalable, environmentally sustainable, and cost-effective active archive solutions designed to securely store cold, unstructured data for long periods, enabling easy access to archived information through advanced data management software and a tiered storage approach.

- **Efficient Archived Data Access:** The joint solution enables enterprises to unlock and utilize their archived data efficiently, reducing risks and operational bottlenecks.

- **Data Migration to Modern Formats:** Together, TDS and SAVARTUS provide a pathway to transition archived data from outdated storage formats to scalable, physically immutable, and easily accessible systems.

- **Secure Data Restoration Services:** Powered by TDS's expertise and RAP, organizations can securely restore data from archived media, ensuring accuracy and compliance with regulatory requirements.

The partnership between TDS and SAVARTUS represents a significant step forward in archived data management. Enterprises in any sector can now access a unified, secure, and efficient solution portfolio to address their data restoration and compliance needs while preparing for future demands.

About SAVARTUS and TDS:

SAVARTUS is a trusted partner in helping organizations optimize operations, reduce storage costs, recover from cyber-attacks and disasters, and ensure data integrity for long-term preservation and compliance. Combining advanced AI technology with storage, engineering, robotics, and software expertise, SAVARTUS offers customizable solutions that seamlessly integrate into any workflow and cater to specific data lifecycle requirements. Industries such as healthcare, law enforcement, manufacturing, and others rely on SAVARTUS for their complex data management needs. Learn more at www.savartus.com. Follow us on LinkedIn.

With more than 30 years of industry experience, TDS is the foremost expert in legacy data management, including archived data management and email archive migration.
